

Policy Definition: <https://github.com/pjsaha1976/laC/tree/main/policy-definition>

Results:

odl_user [~/laC/policy-definition]\$ terraform apply

var.client_id

The user id of the Service Principal identity that terraform will run under

Enter a value: 566b6c6e-5123-4c97-9cf5-60efa9284c57

var.client_secret

The password/client_secret of the Service Principal identity that terraform will run under

Enter a value: kL~8Q~T.i.tCGderzbJRTqH DU-UgfJSFUBcQKbqL

var.policy_name

The name of the Azure Policy Definition

Enter a value: tagging-policy

var.subscription_id

The subscription id of that is in scope for this Azure Policy Definition

Enter a value: 456cc604-544c-45f8-99d0-c1b73aeec440

var.tenant_id

The tenant id of the Service Principal identity that terraform will run under

Enter a value: f958e84a-92b8-439f-a62d-4f45996b6d07

Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the following symbols:

+ create

Terraform will perform the following actions:

```
# azurerm_policy_definition.require_tags_on_resources will be created
+ resource "azurerm_policy_definition" "require_tags_on_resources" {
  + description      = "Ensures that all indexed resources have tags. Denies deployment if
tags are missing."
  + display_name     = "Require tags on all resources"
  + id               = (known after apply)
  + metadata         = jsonencode(
    {
      + category = "Tags"
      + version  = "1.0.0"
    }
  )
  + mode            = "Indexed"
  + name            = "tagging-policy"
```

```

+ policy_rule      = jsonencode(
  {
    + if = {
      + exists = "false"
      + field  = "tags"
    }
    + then = {
      + effect = "deny"
    }
  }
)
+ policy_type      = "Custom"
+ role_definition_ids = (known after apply)
}

```

Plan: 1 to add, 0 to change, 0 to destroy.

Do you want to perform these actions?

Terraform will perform the actions described above.

Only 'yes' will be accepted to approve.

Enter a value: yes

```

```

Plan: 13 to add, 0 to change, 0 to destroy.

Saved the plan to: solution.plan

To perform exactly these actions, run the following command to apply:
 terraform apply "solution.plan"

terraform show solution.plan

```
pjsaha@web-svr:~/laC/terraform-template$ ls
README.md main.tf solution.plan vars.tf
pjsaha@web-svr:~/laC/terraform-template$ terraform show solution.plan
```

Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the following symbols:

+ create

Terraform will perform the following actions:

```
# azurerm_availability_set.main_avset will be created

Plan: 0 to add, 0 to change, 13 to destroy.

Do you really want to destroy all resources?

Terraform will destroy all your managed infrastructure, as shown above.

There is no undo. Only 'yes' will be accepted to confirm.

Enter a value: yes
